## PROFESSIONAL SUMMARY

Laravel Backend Developer and backend-focused Full-Stack Developer with approximately 1.5 years of combined professional and project-based experience building and deploying web, mobile, and admin platforms. Specialized in Laravel 13, REST APIs, database architecture, authentication and authorization, FCM notifications, queues, and Hostinger deployment, with sole backend ownership within cross-functional teams. Delivered or contributed to eight deployed projects and seven admin dashboards across healthcare, e-commerce, marketplace, and education domains.

## TECHNICAL SKILLS

**Backend:** PHP, Laravel 13, Node.js, RESTful API Design, Laravel MVC, Eloquent ORM, API Resources

**Security & Architecture:** Authentication & Authorization, JWT, Roles & Permissions, Queues, Task Scheduling

**Databases & Services:** MySQL, MongoDB, Firebase, Firebase Cloud Messaging (FCM)

**Frontend & AI:** Blade, HTML, CSS, JavaScript, Responsive UI, AI-Assisted UI Prototyping and Debugging

**Tools & Deployment:** Git, GitHub, Composer, Postman, API Documentation, Hostinger Deployment

**DevOps Fundamentals:** Linux, Cloudflare, Docker, CI/CD, Web Server Administration

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer (Backend-Focused)

MedZoneProg | May 2026 - Present

- Own end-to-end delivery of Laravel 13, Blade, and MySQL systems, including requirements analysis, responsive UI implementation, backend architecture, database design, and Hostinger deployment.
- Built and deployed a Pediatric Clinic Management System designed to support up to 50,000 patient records, with appointment scheduling, follow-up tracking, diagnoses, multi-user access, and role-based permissions. [Live Demo](#)
- Built and deployed a 24/7 Surgical Operations Management System covering patient data, operating-room scheduling with conflict prevention, diagnoses, surgeon reports, anesthesia reports, and role-based access. [Live Demo](#)
- Designed and delivered the bilingual Arabic/English MedZoneProg website and full admin dashboard using AI-assisted UI workflows; enabled management of services, software products, FAQs, settings, consultation requests, and contact messages stored in the dashboard and forwarded by email. ### Backend Developer

A to Y Company - Aleppo, Syria | Dec 2025 - Apr 2026

- Served as the sole backend developer in a four-person team alongside three Flutter developers, owning backend architecture and database design for web and mobile products.
- Built REST APIs, JWT-based authentication and authorization, FCM notifications, chat functionality, admin dashboards, API documentation, and production deployments.
- Owned backend delivery for Fanous Platform, Happy Family Mall, and Fattah One Machine across user apps, courier workflows, websites, and admin dashboards.
